SUGAR AND GAS TRUST

Two Principal Stocks Occupying Wall Street Attention.

Inside Knowledge of Their Affairs Used to Advantage - Indianapolis Business Picking Up.

At New York yesterday money on call was easy at 1 per cent.

Prime mercantile paper, 3@5 per cent. Sterling exchange was firm, with actual business in bankers' bills at \$4.881/2@4.88% for demand and at \$4.87%@4.87% for sixty days; posted rates, \$4.88@4.891/2; commercial bills, \$4.861/4@4.861/2.

Silver certificates, 61%c. Bar silver closed at 64%c per ounce (dealers' price); at London, 29%d.

Total sales of stocks amounted to 218,100 shares. The feature of the speculation at the opening of business yesterday morning was Sugar, and this stock monopolized the dealings up to noon, the rest of the list being stagnant. The stock was bought by the same brokers who manipulated the deal on Saturday, and presumably for the same clique. Buying was quite brisk, and within less than three-quarters of an hour an advance of 21/4 per cent. had been established. As usual, the probability of a change in the tariff bill more favorable to the refiners was claimed to be the motive for the improvement, but it is not unlikely that better trade prospects had a good deal to do with the advance. Before 11 o'clock the purchasing movement had lost its force, and the price began to sag off gradually, the last sale being made at a figure 1% per cent. below the highest point touched, leaving only Chicago Gas jumed into prominence

a gain of % on the day. After midday on heavy purchase, based on a report that the Attorney-general of Illinois had decided not to institute the quo warranto proceedings. An advance of 8% per cent. was quickly made before there was time to investigate the statement regarding the Attorney-general's action. As on previous occasions when such a rumor was started, inquiry resulted in the discovery that the story was without foundation in fact, but the stock was well supported, and in the subsequent dealings only 11/4 per cent. of the improvement was lost, the closing price being 11/2 better than the last sale made on Saturday. The strength of the shares was largely due to covering by shorts who had put out some long lines last week, and who feared the effect of a disposition of the litigation favorable to the gas company. The advance brought out very few realizing sales which indicates that the shares are in strong hands. Rumors to the effect that the plan of reorganization of the Eric Railroad Company was vulnerable to attack of the opposition, weakened Erie common, the sales of which were unusually large and resulted in a decline of 1% per cent. on the day. The bears made a slight demonstration in the stock. The general market was very dull, and the shares wheich were usually active fluctuated within narrow limits. St. Paul was sold by London, and the other grangers were weak in sympathy. At the close the tone of speculation was heavy, and, compared with Saturday's closing prices, irregular. The railway and miscellaneous bond mar-

although some shares scored gains. Gov-

ernment bonds were firm. State bonds were

LOCAL GRAIN AND PRODUCE. The Week Opens with a Brisk Trade

and Firm Prices Ruling. Trade on the wholesale streets yesterday was a decided improvement over any day of either the first or second week of April. Morning trains brought in numerous buyer mail orders were large and there was

more cheerful air noticeable in bus-

iness circles as a result of a summer-like INDIANA MD HOM GONELY day. If the present style of weather continues the week promises to be one of the best in a business way of the present year. Prices in all lines carry a steady tone. Eggs are higher and poultry hardly as firm as last week. It is predicted that rish potatoes are to go to \$1 a bushel. They are scarce and the demand is active. branges are scarce, and good fruit higher. There is much inferior and worthless stock shipped here from California that is ofered and finds slow sale at any price. Dry-goods house experienced a good day, prices in all lines carrying an easy tone. The seed men continue to be unusually busy. Clover seed is scarce and firm at our quotations, which are the prices at which the seed men wholesale. The hide market is active, but prices remain unchanged. The local grain market started in with a fair attendance on 'Change and more

spirit shown in the bidding, especially for forn and oats. Track bids ruled as follows: Wheat No. 2 red, 54c; No. 3 red, 521/2c; Wheat No. 2 red, 54c; No. 3 red, 52½c; rejected wagon wheat, 54c.

A Wounded-Knee Hero Satirized by Massachusetts Students.

BOSTON, Mass., April 16 .- First Lieut. H. L. Hawthorne, U. S. A., military instructor in the Massachusetts Institute of Technology, is in high dudgeon, and has applied to be relieved from duty as professor of military science and sent back to his regi-Prints-Allen dress styles, 434c; Allen's ment, the Fourth Artillery. It has been known for some time that there was trouble in the institute, and that Lieutenant Hawthorne refused to drill the students, but just what the trouble was has just come out. In the battle of Wounded Knee a bullet from a Sloux rifle drove the works of Lieutenant Hawthorne's watch far into his body. The wound healed, but became troublesome. Finally he was advised to seek medical aid, and the Lisutenant came to the Massachusetts General Hospital. The operation performed there was delicate, but was successful, the surgeons finding one of the watch wheels near the spine. The discovery of a wheel in the Lieutenant's body excited the risibles of the students whenever the matter was mentioned, and when the junior classmen, who publish the Technique, the institute magazine, made the Lieutenant the subject of a satire he hotly resented it and asked the faculty to expel the editors. The faculty refused to do so, and the Lieutenant asked to be relieved. Some of the boys have hinted that the officer's technical lectures on Hannibal, Caesar, Napoleon and other great generals and their wars were just a bit tedious, so in the last number of the Technique they got back at the Lieutenant in a mock examination paper. One of the questions in this paper was: "What are the three greatest battles of history?" The answer to this was, "Waterloo, Gettysburg and Wounded Knee." Then followed kindred questions, bringing "Wounded Knee" at the end of every answer. Wounded Knee was conspicuous all through the paper, but the question offensive to the Lieutenant was: "If a lieutenant in the regular army should have a watch shot into him, what would you call t-time flies or a watch on the spine?" There were other references more or less personal, and when the Lieutenant's attention was called to the paper he took the matter before the faculty. He has held the place of military instructor for nearly three years.

WHEAT CLOSED FIRM

Strong Recovery After a Weak and Low Opening Yesterday.

Liberal Decrease in the Visible Was One of the Encouraging Facts-Pork Nets a Gain of 50 Cents.

CHICAGO, April 16.-Wheat opened weak and closed strong to-day with a gain of 4c for May. Favorable crop reports caused the early weakness and reports of crop damage the later strength. A liberal decrease in the visible supply also aided in the recovery. Corn was firm and gained 4c. Provisions were very strong and closed at the top of a 50c advance in pork.

Wheat got a weak start from the bearish nature of the early news. Foreign advices were to the effect that showers prevailed in England, and a private dispatch from Strasburg, Germany, said that heavy rains were general there, and that crop prospects, which before were good, still remained so. Some more rain had fallen in Kansas, and of all the planks in the dryweather platform of the recent short bull campaign the drought in California alone remained. Even that was jumped on this morning, a dispatch from New York received here about the opening reporting rain in northern California. There was no confirmation of the latter rumor, but being in line with the general tendency of the other news, it helped to increase the bearish feeling. Cables gave no support to the market. The amount of wheat on passage had increased 512,000 bushels and India appeared to have shipped more liberally than of late, Beerbohm's giving 320,000 bushels as India's contribution to the quantity put afloat, Receipts in the Northwest were again liberal. All those matters put together caused a decline in price here of ic per bushel in twenty minutes compared with Saturday's closing. The business done during the decline was not very heavy, and after the decline trading became quite slack, but with indi-cations of returning confidence among holders. May opened with sellers at 59%c, as against 6014c at the close on Saturday. Buyers at 59%c were extremely scarce, but there were a few. In the next two seconds there was some business done at 59/2c, followed by a rally to 59%c, and then by a lecline to 594c. July, which closed on Saturday worth only 1%@1%c more than May, improved to a premium of from 1%@2c in the first half hour. The first July trades were at 611/2c, as against 62c on Saturday. The decline of 1c in May carried July off to 61%c. The export clearances from the four principal Atlantic ports amounts to about 230,000 bushels in wheat and flour. The decrease in the visible was 1,545,000 bushels, whereas some had looked for a small increase, and no one had predicted a possibility of over 500,000 busnels decrease. The sentiment of the crowd underwent a complete change on account of the considerable decrease, and an advance to 601/60604c for May and to 61%c for July was the work of a very few minutes. There was a reaction in May to 59%c, but sellers did not offer much. The trade continued light, with a rather feverish feeling prevailing, however, and not much buying was required to put up May again to 60%c. Closing cables came very weak, and caused another spell of comparative heaviness here, May dropping again to 59%c. After the 16c decline which followed the report of the weak cables there were some more harrowing doubt dispatches from California which started the crowd to buying again, and the market went higher than before and closed at 6012c for May.

The corn market was firm after a momentary fit of weakness at the opening. There was no change of moment in previously existing conditions to account for the strength unless the greater buying disposition of foreign houses at New York be accepted as warranting more firmness here. The visible supply decreases 1,469,000 bushels, against 1,109,000 bushels on the similar week a year ago, and the publication of that fact was the cause of some occasion of strength in the middle of the session. The firm of Bartlett-Frazier took a good deal of corn during the day in soft spots. The business done was not heavy. May opened at 38%c, as against 381/2c on Saturday. It immediately began to improve and reached 38%c. The market was at its best as business was coming to an end for the day, and May closed at 38%c and July at 38%c, or %c

higher since Saturday. Larger receipts and the fine weather sufficed to cause a heavy feeling in the oats market. Opening values were at one time 1/2c under Saturday's last quotations, but at noon had gained 4c over the opening quotation. The business transacted was very light. May started at 32c, sold at 31%c and rallied to 324c. The market showed a still more steady feeling at the close, and prices rested where they did on Saturday. May sold at 32%c, and at the end that price was bid.

Provisions opened with a bounce of from lic to 20c over Saturday's closing rates for pork, .071/2@.10c over for lard, and from .05c to :10c higher for ribs. That was only the beginning to a very strong market, which remained of that complexion to the close. Armour was supposed to be behind Sam Wolff in some sleight-of-hand work which that broker performed in the pork market. He bid prices up and made occasional sales as well, and whether he accumulated any in the end was not quite determinable, but he gave to the market its bullish tone. Roloson sold rather freely on the advance, and Swift & Co. also had some for sale on the hard spots. The strongest phase of the market was prevailing as it closed, with everything at the top of the day's range. Pork closed, for May, at \$13.30, and, for July, at \$13.40, being a net gain of 50c per barrel. Lard, for May, gained .321/2c, and May ribs closed .22%c higher.

Estimated receipts for to-morrow are: Wheat, 105 cars; corn, 350 cars; oats, 227 Huron being 1c. Leading futures ranged as

One of the things that affect the drygoods trade is the number of fashion journals and the prominence given to fashion items in the dally newspapers. The average woman and girl now usually knows all about coming materials, popular fabrics and the advance styles quite as soon as the merchant or dressmaker, if not before, so that in the majority of cases the woman out for a shopping knows just what she wants and hunts until she gets it. It happens, however, fortunately for the stores, that few fashion papers or fashion authorities agree upon what is to be high style until it has been demonstrated by those who lead and are known to be posted, but by that time very often the greater number of women, not wanting to wait, have got what they thought best and taken the chances on the style. They may have hit it or they may not. Mostly they do not. Taken all in all, there is no better way than to trust to some good authority in some of the large dry-goods establishments where all such matters are studied with the greatest care.
